

## INSTRUCTION MANUAL FLOOR DIMMER 310X-SERIES

This floor dimmer is suitable for incandescent lamps, high-voltage halogen lighting 230V (40-500W) and low-voltage halogen lighting in combination with a dimmable transformer. Use indoors only. This floor dimmer is fitted with a fuse. For optimum performance load the dimmer up to 80% of its maximum power!

The producer is not liable for damage caused by incorrect use or improper installation of the dimmer. The warranty period is 2 years from the date of purchase, to be proven by means of your purchase receipt.

Lamp 1: on/off function

Lamp 2: to be operated with the sliding button. On/off and dimming.

### INSTALLATION:

- Always switch off the power before installing!
- Unscrew the housing and remove the top.
- Strip the power supply wires sufficiently and tighten them firmly in position 1 & 3 (see drawing).
- Install the wiring that controls the lamp for on/off switching (push button) at screw 7 & 12.
- And the wiring that dims the lamp by means of sliding switch at screw 8 & 10.
- Replace the top and tighten the screws. Make sure the wires are properly clamped under the strain reliefs.
